

INTRODUCING GATE THREE CONSTRUCTION

Gate Three's Construction bundle presents insight into important field activities to let you know where your project and your team stands. From daily site logs and Quality and Safety to managing and tracking external documents such as RFIs and submissions you will always be in control of the project. The Construction bundle is built to keep projects moving towards significant milestones.

- Control, customize and automate workflow (SIs, RFIs, Submissions, and more)
- Improve quality and safety by automating your QA/ QC programs (or leverage ours)
- Enable teams to collaborate on critical construction-related information and documents
- Track project milestones and LEED progress

WHAT'S INCLUDED

RFI

Tracks the entire RFI workflow across subcontractors, team members, and consultants.

DAILY SITE REPORTS

Superintendents create and manage daily log of site activity/conditions - use ours or create your own.

SUBMISSIONS

Automated workflow for planning, requesting, reviewing and tracking of all required submittals from contractors and suppliers.

QUALITY AND SAFETY

Create, modify and manage a quality or safety program with the related deficiencies.

MILESTONES AND SCHEDULING

Upload, create, revise and connect project documentation to key project milestones.

MEDIA

Upload and manage your project photos and link them to other Gate Three documents.

SITE INSTRUCTIONS

Log Site Instructions provided by the consulting team and forward to project members from the Contacts module.

SUSTAINABILITY

Setup and track a LEED (or any Sustainability) plan for your project
