INTRODUCING GATE THREE FOUNDATION

Gate Three Foundation delivers the basis for effectively running a project. This bundle permits users to view, share, control and manage project drawings, specification and communication. Foundation has the capabilities to provide both comprehensive detail as well as a single dashboard overview for a quick analysis of project progress.

- Streamlined and accurate project communication with all stakeholders and personnel
- Single and collaborative view of the project progress.
- Improve efficiencies with a single and customizable workflow business processes.

WHAT'S INCLUDED

CONTACTS

Manage/access a single database of Contacts - owners, subcontractors, consultants, vendors, employees.

PROJECT PROFILES

A single file that captures all the pertinent information about the project - bid information, contract type, construction method, schedule summaries.

COMMUNICATIONS

Categorize and log all project correspondence within a centralized Project Inbox from your computer or your mobile device.

ACTIVITIES

A single dashboard of the activities assigned to you and others on each project.

DESIGN & BIM

Manage your drawings, includes version control and supersede functions.

MEETINGS

Create, issue and log meeting minutes and agendas

eBINDERS

Place all project documentation in it's own folder taxonomy so you are ready for closeout.

PRECONSTRUCTION - OPTIONAL

Enables Bid-Notification, Estimate consolidation and Costing detail for the project team

REPORTING - OPTIONAL

Schedule, and run on-demand, customized report

COMMISSIONING - OPTIONAL

Manage all corresponding forms/reports for assets on custom electronic forms
