▶ INTRODUCING GATE THREE PROCUREMENT

Gate Three Procurement transforms data into business intelligence with its ability to manage your project's financials. Purchase orders, invoices, contracts and changes will instantly update both budget and costing modules. As a project-wide solution that can work seamlessly with your own accounting software Procurement improves cost management efficiency by eliminating double-entry redundancy and reduces risk with streamlined financial control.

- Clear view of project budget details at all time
- Reduce project risk through integrated change control process
- Gain financial control by replicating your procurement processes through configurable workflow

▶ WHAT'S INCLUDED

COSTING

Create and manage the project costing using a standard set of cost-codes

CHANGES

Create and issue project and sub-contractor Change Orders which automatically updates Budget, Costing and Billing

BUDGET

Track all budget transfers, changes, commitments, costs, and billings against your budget lines

PO / INVOICES

Create, manage & distribute POs and the associated invoices with configurable workflow for approval

CONTRACTS

Create requisitions and issue contracts while simultaneously updating Budget and Costing.
